IDENTIFIERS *Oklahoma Consortium on Research Development

ABSTRACT

This supplement to the final report (ED 040 693) presents research summaries of member institutions of the Oklahoma Consortium on Research Development--an organization which seeks, as one of its objectives, the development of viable, ongoing research programs. The summaries contain information on: (1) institutional involvement in the Consortium; (2) institutional benefits from this involvement; (3) institutional plans for further research activity, and (4) a comparison of project and institutional research office information and related activities for 1966-67 and 1969-70. INSTITUTIONS' RESEARCH ACTIVITY SUMMARIES

Prepared by

Larry K. Hayes
Project Supervisor

Oklahoma Consortium on Research Development
Oklahoma State Regents for Higher Education
State Capitol, Oklahoma City

June, 1970

FOREWORD

The Oklahoma Consortium on Research Development had as one of its objectives the development of a viable, ongoing research operation at each member institution.

This supplement to the final report presents the following information concerning each institution: institutional involvement in Oklahoma Consortium on Research Development activities; institutional benefits from Oklahoma Consortium on Research Development involvement; institutional plans for further research activity; and a comparison of project and institutional research office information and related activities for 1966-67 and 1969-70. Ten institutions failed to provide all information requested and, thus, their summaries are not complete.

Hopefully, this information will enable member institutions to compare their progress with other institutions and will be of benefit to those seeking to evaluate the Oklahoma Consortium on Research Development.

Larry K. Hayes
Project Supervisor

CENTRAL STATE COLLEGE

President Garland Godfrey
Coordinating Council Member Leslie Lewis

Institutional Involvement

Central State College has been involved in over thirty pilot research grants, approximately ten development seminars and has sent four of its staff on summer research laboratory experience programs to the University of Oklahoma and Oklahoma State University. Each grant involved a number of faculty and students in addition to the project director. Initial seed monies were instrumental in applying for and receiving larger grants from other agencies.

Institutional Benefits

Central State College has established a research and development office and a research committee whose function it is to screen proposals by employing faculty to read proposals prior to submitting them to a granting agency. This has broadened and elevated the research awareness level of the entire faculty. Development of an institutional research thrust.

Institutional Plans

The research committee at Central State College will be extended to four times its original size. Central State College plans to pursue grants in a variety of areas not previously contacted. Closer cooperation and working relationship with other institutions both in and out of the state.

INSTITUTION: Central State College

EAST CENTRAL STATE COLLEGE

President Stanley P. Wagner
Coordinating Council Member Roy T. Maxwell

Institutional Involvement

East Central State College received thirty grants from the Oklahoma Consortium on Research Development which totaled $11,050. This was matched by $16,799 of local funds. East Central State College had representatives at numerous Consortium training programs and development seminars including the following: Project Workshop, Model Research Offices Workshop, Institutional Research Workshop and subsequent meetings, Computer Seminar and subsequent meetings, National Research Training Institute, Phase II Workshops, Business Education Seminars, Teacher Education Seminar, Public Education Workshop, Higher Education Evaluation Seminar, and six state college seminars. The involvement has been from the president down to the student body. Activities have been varied and have involved a number of different departments and personnel.

Institutional Benefits

As a result of the Oklahoma Consortium on Research Development, East Central State College now has a research and development office and a local budget for research grants. It has a number of faculty members who are actively involved in research and development projects. At least $130,000 in outside funds can be traced directly to the Oklahoma Consortium on Research Development.

Institutional Plans

The same operation set up during the Oklahoma Consortium on Research Development will continue but with more personnel involved. Plans are being developed at the present time for several new projects in the areas of science education, water research, and counseling services for disadvantaged students.

NORTHEASTERN STATE COLLEGE

President Harrell E. Garrison
Coordinating Council Member Elwin Fite

Institutional Involvement

The college became involved immediately in pursuing aspects of Oklahoma Consortium on Research Development activities which gave promise of providing assistance in research. A campus research committee considered opportunities available in research under Consortium-sponsored activities as they were announced. Some of the projects in which the college participated include: individual faculty pilot projects; cooperative seminars; attending seminars sponsored by the Consortium; obtaining consultants; securing ERIC information and materials; obtaining services from the Regents' office; counsel by the Regents' staff; and developmental workshops. They have all given impetus to research activities at Northeastern State College.

Institutional Benefits

The Oklahoma Consortium on Research Development assisted the college by encouraging faculty research. The support of research by college faculties by the Oklahoma State Regents for Higher Education has been very helpful. Cooperative inservice activities with other colleges and the opportunity to share concerns and ideas about research have benefitted the college.

Institutional Plans

The college plans to fulfill its responsibility in research and to continue its research organization. There is a director of research and development and a faculty committee on research and institutional studies. Each fall the faculty commits itself to activities for the ensuing year and special annual reports have been made on research at Northeastern State College since 1948.

SOUTHEASTERN STATE COLLEGE

President Leon Hibbs
Coordinating Council Member J. B. Fox, Jr.

Institutional Involvement

During the last year, we have received small grants in four different disciplines which have created an awareness of the needs and opportunities to do local research. Four faculty members and several college and high school students have cooperated and have been a part of these studies. The local high school faculty and students have participated in at least two studies, and thereby received direct benefits of the research involved as well as the knowledge of the techniques of the research involved.

Institutional Benefits

The greatest institutional benefit has probably been the realization of the grant recipients and their colleagues that not all research must be on a scale which involves substantial outlays of time and financial support to be meaningful and important to an area of instruction, and frequently to an entire institution.

Institutional Plans

Our college will make an effort through the office of institutional research to encourage, and assist, all faculty members in research projects in which they have an interest. An effort will be made to obtain information concerning all research being done on our campus, and then lend whatever help is possible in securing needed facilities, limited financing, and specialized assistance whenever it is needed.

SOUTHWESTERN STATE COLLEGE

President Al Harris
Coordinating Council Member Harold Massey

Institutional Involvement

Twelve pilot research grants and one seminar, 1967-68; four pilot research grants, 1968-69; six pilot research grants, 1969-70; representation and/or participation in most of the interinstitutional seminars; seminar on research design and data analysis for our faculty; workshop on proposal writing for public school personnel in this area.

Institutional Benefits

Assignment of one person (part-time) to coordinate institutional research activities; appointment of a now operative institutional administrative research committee; money budgeted to match consortium grants; complete ERIC materials on microfiche procured.

Institutional Plans

Continuation of the progress noted in the section immediately above, and hoped-for expansion and extension in these and related activities.

CAMERON STATE AGRICULTURAL COLLEGE

President Don Owen
Coordinating Council Member Richard Murray

Institutional Involvement

The primary involvement of Cameron State Agricultural College with the Oklahoma Consortium on Research Development activities has been in terms of individual projects in which faculty members have participated as well as the participation of the Coordinating Council member on the Council.

Institutional Benefits

The primary benefit of Cameron State Agricultural College has been the awareness of the practices relating to research on campuses of like institutions. A secondary benefit has been the stimulation received to do further activity in this field as the result of the associations developed and the information shared.

Institutional Plans

A more coordinated plan of research activity at the institution will have emerged primarily as a result of the efforts of the Oklahoma Consortium on Research Development involvement.

LANGSTON UNIVERSITY

President William E. Sims
Coordinating Council Member Laron Clark, Jr.

Institutional Involvement

Faculty members were awarded two pilot research grants by the Oklahoma Consortium on Research Development in 1967-68; two pilot research grants in 1968-69; and four pilot research grants in 1969-70. A research development seminar was conducted on campus to develop techniques of grant proposal writing. All of the facilities of the institution, including the computer, are available for faculty research. Two faculty members who had received grants presented papers at the "Dissemination Conference of Research Activities."

Institutional Benefits

Impact of the Oklahoma Consortium on Research Development on research activities at the institution is apparent, as research activity has been significantly stimulated. There is some effort toward curriculum development which can be attributed to Oklahoma Consortium on Research Development pilot grants. A research committee has been organized to increase and coordinate institutional research.

Institutional Plans

The institution will be able to provide only a small fund for research in the immediate future. An effort will be made, however, to actively solicit financial support from private foundations. The research committee will explore sources of support. It is hoped that the institutional allocation for research will be supplemented by funds from other sources.

OKLAHOMA PANHANDLE STATE COLLEGE

President Freeman McKee
Coordinating Council Member Royal H. Bowers

Institutional Involvement

This institution's involvement includes funding of a Phase II Consortium Workshop, purchase of ERIC materials, and funding of eight pilot research projects completed by professors in the following fields: Animal Science, Biology, Chemistry, English, Geology, History and Home Economics.

Institutional Benefits

The greatest benefits of involvement in the Oklahoma Consortium on Research Development accrued through the development of a greater awareness for the need of research at this institution on the part of administrators, faculty, and students in institutional research and pure and applied research in several academic fields.

Institutional Plans

This institution is qualified for a Title III grant from HEW, and the sizeable proportion of this grant will be spent in implementing improved procedures in doing institutional research.

CONNORS STATE COLLEGE

President Melvin Self
Coordinating Council Member James F. Klemm

Institutional Involvement

Connors State College was represented at all meetings of the Oklahoma Consortium on Research Development. A faculty development workshop was held at Connors State College, with nine faculty members and administrators attending.

Institutional Benefits

The greatest benefit that Connors State College received from our involvement was the training of our personnel at the workshop. The training in data collection and analysis has been especially helpful. We benfitted from all literature sent out by the Oklahoma Consortium on Research Development.

Institutional Plans

Connors State College will periodically update its data on demand and supply of technically trained personnel. We will also continue our testing program of seniors in the area high schools.

EASTERN OKLAHOMA STATE COLLEGE

President James M. Miller
Coordinating Council Member Francis H. Means, Jr.

Institutional Involvement

Eastern Oklahoma State College has participated to the extent of three grants. These have served to interest faculty members to their potential for meaningful research projects. The Phase II workshop created the greatest interest as it helped a considerable number of Eastern's faculty to understand how proposals for funding of small research projects should be written and submitted. It is expected that several faculty will take the initiative in preparing future proposals in their areas.

Institutional Benefits

Some benefits of the Oklahoma Consortium on Research Development have been: (1) greater recognition of abilities and resources of the two-year colleges by the four-year colleges and universities; (2) increased help to junior colleges from four-year colleges and universities in helping junior college faculties to update and upgrade themselves; (3) fuller understanding among all members of needs for special programs such as ERIC, television, etc., and how they can be met; (4) realization of junior college faculty members that they can do limited research.

Institutional Plans

Eastern Oklahoma State College plans to encourage individual research during the summers and to initiate limited research projects during the academic year. Many of these will be institutional in nature, but will benefit the entire faculty and student body.

NORTHERN OKLAHOMA COLLEGE

President Edwin E. Vineyard
Coordinating Council Member Gerald E. Burson

Institutional Involvement

Northern Oklahoma College has been active in the Oklahoma Consortium on Research Development since its inception. Northern was fortunate to have a person serve on the Steering Committee during the Consortium's life span. Northern had three grants awarded during the program, one faculty research grant and two developmental seminars. More than ten faculty members participated in Consortium-sponsored activities at other institutions.

Institutional Benefits

It is always difficult to evaluate benefits that are attitudinal but the Oklahoma Consortium on Research Development helped many of our faculty meet and become active with their colleagues in evaluating and improving their effectiveness as instructors. This resulted primarily through participation in developmental seminars.

Institutional Plans

Northern Oklahoma College has plans to have an institutional research office that will serve departments in curriculum evaluation and planning and provide the administration with useful data which will be used to reach decisions. Northern also hopes to exchange data with other Oklahoma junior colleges and prepare a data bank for coordinated research activities.

OKLAHOMA MILITARY ACADEMY

President John E. Horne
Coordinating Council Member Claude F. Jones

Institutional Involvement

Six projects were funded under the Oklahoma Consortium on Research Development for a total of $2,000. The first was a modification of the Phase II program and funded consultants to aid in the organization and development of a research committee. The small grants for consultation funds and ERIC purchases need no explanation. A multi-institutional workshop in mathematics involving ten junior colleges and two individual faculty research grants, one in mammalian natural history and one in archaeology, completes the list. Students were involved in the last two.

Institutional Benefits

The research committee continues. A total of $230,000 in outside funding has resulted and an office and procedures for institutional research begun. The mathematics workshop resulted in a $39,000 year-long program funded from the National Science Foundation and will continue without outside help. The individual research projects are nearing completion, but the activity will continue.

Institutional Plans

Automation for institutional research is beginning at this time. A new consortium administered by the Oklahoma Military Academy will allow for a full-time research office for a year. A continuation of a consortium arrangement with Region VIII of the AAJC will continue.

BETHANY NAZARENE COLLEGE

President Roy Cantrell
Coordinating Council Member Forrest E. Ladd

Institutional Involvement

Bethany Nazarene College has made the most use of the Consultation, Phase II Faculty Workshop, and ERIC grants. The workshop grant supported an institutional self study. An ERIC microfiche file has been set up and indexed on the computer. Three pilot research grants have been completed. Our data processing staff has participated in Consortium-sponsored activities.

Institutional Benefits

The major benefit was the aid to our self study from the five consultants we were able to get with Oklahoma Consortium on Research Development support. These benefits will be reflected in the outcome of our self-study program. An institutional research director and committee have been appointed, and have begun to function.

Institutional Plans

Further study will be done in the self study in order to provide a data base for recommendations. The pilot research in paleobotany will be continued beyond the duration of the grant. Some faculty members are doing research in the use of computers in instruction.

OKLAHOMA BAPTIST UNIVERSITY

President Grady Cothen
Coordinating Council Member W. E. Neptune

Institutional Involvement

Institutional involvement during the years of the Consortium's existence has involved research activities in the departments of nursing, education, psychology, modern languages, sociology and physical sciences. Members of the teaching and administrative staff have participated in pilot grant projects, interinstitutional developmental seminars, and in seminars on research activity sponsored by the Oklahoma Consortium on Research Development. Other staff members not directly engaged in these research activities have cooperated with surveys, curricular studies, and other activities derived from Consortium-sponsored enterprises.

Institutional Benefits

In addition to the obvious benefits accruing from the above involvements, one of the indirect benefits gained from individuals and departments was assistance in methodology and information which was applicable to our recently completed revision of all baccalaureate programs (following a 4-1-4 curricular pattern).

Institutional Plans

During the period of our involvement with the Oklahoma Consortium on Research Development, the University has formed (with the approval of the Board of Trustees) a University Grants Committee, which is responsible for encouraging research activity on the part of the faculty and for administering institutional grants to support faculty research projects.

OKLAHOMA CHRISTIAN COLLEGE

President James O. Baird
Coordinating Council Member Marshall Gunselman

Institutional Involvement

The primary involvement of Oklahoma Christian College with the Oklahoma Consortium on Research Development has been through the development seminars and through interchange at Consortium meetings.

Institutional Benefits

Benefits have been mainly through encouragement of faculty members to become involved with research activities. This has led to several non-consortium projects and funding.

Institutional Plans

We plan to continue some of our research activities, especially in the realm of curriculum reorganization and development projects.

INSTITUTION: Oklahoma Christian College

OKLAHOMA CITY UNIVERSITY

President Dolphus Whitten, Jr.
Coordinating Council Member Melvyn G. Price

Institutional Involvement

Faculty members from Oklahoma City University have obtained eight pilot research grants and one development seminar from the Oklahoma Consortium on Research Development between 1967 and 1970. Approximately $5,000 has been appropriated for these projects during this period of time. Most of the funds would not have been obtainable without the support of the Consortium matching funds. Oklahoma City University sponsored a faculty member's presentation of his research study at Central State College's Reporting Conference on March 12th and 13th. Dr. Charles Cahill, Director of Research and Associate Dean of Arts and Sciences, represented Oklahoma City University at the conference sponsored by East Central State College in Ada, Oklahoma.

Institutional Benefits

One of the most significant results of our involvement with the Oklahoma Consortium on Research Development activities was the recent decision to develop a faculty research program. Dr. Charles Cahill was appointed Director of Research and a committee composed of representatives from each of the colleges was selected. Many of the research projects would not have been possible without the encouragement and the leadership provided by the Oklahoma Consortium on Research Development.

Institutional Plans

Research activity is increasing--especially encouraged are studies which are designed to enrich instruction and strengthen curriculum.

ORAL ROBERTS UNIVERSITY

President Oral Roberts
Coordinating Council Member Hubert E. May

Institutional Involvement

We have been represented at many of the Oklahoma Consortium on Research Development meetings for the past three years. Members of our faculty and administration have worked on pilot research projects, a development seminar, and a summer faculty research grant from the Consortium. We have taken part in the various surveys sponsored by the Consortium.

Institutional Benefits

The Oklahoma Consortium on Research Development was instrumental in getting us started in setting up a research office and a faculty committee for research. We are also appreciative to the Consortium for funds received in the projects mentioned above.

Institutional Plans

We have set up a yearly in-house fund ($2,000 at present) for supporting faculty research. These monies are primarily for pilot projects. It is hoped that some of these projects will develop to larger projects which can be supported by outside funds. We think that our research is progressing and will progress in the future.

BACONE COLLEGE

President Garold D. Holstine
Coordinating Council Member Leo D. Harman

Institutional Involvement

Bacone College has been directly involved with three programs of the Oklahoma Consortium on Research Development and the grant to the library for ERIC materials. Two development seminars were held on our campus for our faculty, and a research project by Nancy Mack on cassette grading for the English students. In addition to this, individuals have been involved in meetings that have been held elsewhere.

Institutional Benefits

The monies for the ERIC materials, with other money from the school, was used to purchase an extra lens so that our reader-printer could be used with microfiche. The research seminars resulted in a research proposal to the Consortium, which was funded. A number of faculty members became interested and are now using techniques developed, or related techniques.

Institutional Plans

The faculty is now discussing the use of behavioral objectives and this fall we will be re-evaluating our institution, with a good deal of research work being the necessary groundwork for this evaluation.

INSTITUTION: Bacone College

SEMINOLE JUNIOR COLLEGE

President Elmer Tanner
Coordinating Council Member George H. Lemons

Institutional Involvement

Seminole Junior College reactivated its membership in the Oklahoma Consortium on Research Development only twelve months ago. Therefore, we were only able to participate to a limited degree in the three-year activities of the Consortium. One $400 development seminar grant was utilized.

Institutional Benefits

The help derived from the seminars held were of invaluable help in determining the direction in curriculum our college would take. We have added a reading program, expanded our vocational offerings and augmented our transfer program as a direct result of the seminars held pursuant to our grant proposal.

Institutional Plans

Two proposals are in the process at the Department of Health, Education and Welfare. One will survey the possibilities of a cooperative education program in our area. The other proposal will ascertain our role as an influence on the understanding processes of disadvantaged citizens of our area.

POTEAU COMMUNITY COLLEGE

President Orville Johnson
Coordinating Council Member Orville Johnson

Institutional Involvement

The college participated in a voc-tech training seminar jointly with Eastern early in the program. Most of outstanding leaders in Oklahoma vocational education participated.

Institutional Benefits

The involvement in the voc-tech seminar caused our staff and faculty to become more aware of the need for technical education in the junior college. Many have been instrumental in allowing college land to be used for location of the Kiamichi Area Voc-Tech School.

Institutional Plans

College is beginning a research project in location of potential student personnel, their characteristics, their needs, as well as a follow-up on progress made when students leave Poteau.
